SUBJECT INDEX

Aldosterone
biosynthesis, adaptation of, to sodium and potassium intake, in the rat, 271
effect on (Na^+, K^+)-ATPase of amphibian sodium-transporting cells (A6) in culture, 581
evidence that corticosterone is not an obligatory intermediate in, biosynthesis, 567
Androgen(s)
receptor(s)
domain structure, genomic organization and regulation or expression of the human, 307
in prostate, immunohistological localization and mRNA characterization, 311
structures, mutations, antibodies and cellular dynamics, 41
Arachidonic acid
as a possible modulation of estrogen, progestin, androgen, and glucocorticoid receptors, 219
Aromatase
antitumor effect of a specific, inhibitor 1-methyl-androsta-1,4-diene-3,17-dione (atamestane) in female rats bearing DMBA-induced mammary tumors, 435
effect of the, inhibitor 4-(phenylthio)-4-androstene-3,17-dione, on dimethylbenz(A)anthracene-induced rat mammary tumors, 439
effect of medroxyprogesterone acetate on, 443
inhibition and experimental antitumor activity of FCE 24304, MDL 18962 and SH 489, 431
inhibition by R 76713: experimental and clinical pharmacology, 427
Binding domains
of the human receptor, 355
Bone cells
evidence for a direct effect of estrogen on, 279
Brain
steroid synthesis, in cell cultures, 511
Breast cancer
antagonism between estrogen and androgen on GCDFP-15 gene expression in ZR-75-1 cells, 397
diet and urinary estrogen profile in, 527
DNA polymerase α activity in, 443
effect of ethynyloestradiol and medroxyprogesterone acetate on estrogen and progesterone receptors in, 403
effects of steroidal and nonsteroidal oestrogen antagonists on the proliferation of human, cells, 183
epidermal growth factor receptor in, 123, 505
immune-deficient animals to study hormone-dependent, 169
importance of estrogen sulfates in, 155
mechanism of growth regulation, 107
monoclonal antibody in, 149
overexpression and hormonal regulation of pro-cathepsin D in, 177
prognostic factors for recurrence and survival in axillary node-negative, 145
regulation of sex binding protein synthesis in, cells, 199
role of growth factor receptors in, 123
Calcitriol
effect of, on natural killer cells activity in hemodialyzed patients, 423
Corticosteroid(s)
biosynthesis of adrenal, 563
Corticotropin releasing hormone
LH action in Leydig cell, modulation by, 205
Cytochrome *P*-450
effects of dietary sodium restriction and potassium intake of cholesterol side-chain cleavage, 385
Dehydroepiandrosterone fatty acid esters
carriers of, in human serum, 559
DNA
ligand-dependent interaction of the dioxin receptor with target, 375
regulation of expression of mouse mammary tumor virus, by steroid hormones and growth factors, 139

Endometrial cancer
effects of serine and glycine on proliferation of an Ishikawa cell variant, 165
immune-deficient animals to study hormone-dependent, 169
overexpression and hormonal regulation of pro-cathepsin D in, 177
9-ene-tetrahydrocannabinol
effects of, on hormone release and immune function, 263
Epidermal growth factors
receptors
in breast cancer, 123
in endometrial carcinoma, 505
in human benign prostatic hyperplasia, 499
Estradiol
induction of accelerated energy metabolism in prepuberal rat uteri: mRNA hybridization and [^{13}C]NMR studies, 289
organometallic derivatives of, as bioligands, 301
Estrogen(s)
and the skeleton: cellular and molecular mechanisms, 285
evidence for a direct effect of, on bone cells, 279
receptor(s)
ontogeny of, in chick oviduct, 293
gene, stable transfection of, into a human osteosarcoma cell line, 483
identification of constitutive and steroid-dependent transactivation domains in the mouse, 33
transformation of, detected by two monoclonal antibodies, 297
Estrogen sulfates
importance in breast cancer, 155
Estrone sulfate
effect of, in the central nervous system–senile dementia (Alzheimer's type), 521
Gene(s)
glucocorticoid repression of pro-opiomelanocortin, transcription, 63
human somatotropin, promoter, analysis of *cis*- and *trans*-acting elements in the hormone sensitive, 79
uteroglobin, correlation with steroid receptors, 11
vitellogenin, B1, *cis*- and *trans*-acting elements of the estrogen-regulated, 17
Gene expression
insulin enhances glucocorticoid induction of, 333
Glucocorticoid(s)
binding sites in solubilized microsomes, 325
low affinity binding sites, in rat liver microsomes, 97
receptor(s)
binding to DNA-cellulose, 319
effect of removal of an endogenous metal, 315
in mononuclear leukocytes, 331
phosphorylation and cycling in intact cells, 85
regulation of, activity, 331
structure and activation, 53
repression of pro-opiomelanocortin gene transcription by, 63
Gonadotropins
levels in young African women with filarial infection, 577
Growth factors
and mechanisms of normal and malignant breast epithelial growth regulation, 107
regulation of expression of mouse mammary tumor virus DNA by steroid hormones and, 139
role of, in the progression of breast tumours, 133
Heat shock protein
interaction with steroid receptors, 369
Human hyperplastic prostate
metabolism of androgens in, 467
17β-Hydroxysteroid oxydoreductase
in the endometrium of normal women and in patients with pelvic pain and polycystic ovaries, 535
Hypothalamus–pituitary–adrenal-axis
mechanism of virus-induced stimulation of, 235

Immunoglobin A (IgA)
in uterine tissues, effect of estrous cycle, hormone treatment, and intrauterine immunization, 229
Insulin
enhances glucocorticoid induction of gene expression, 333
Interferon-β2
effect of, on glucocorticoid action in rat hepatoma cells, 479
Interleukin-6
effect of glucocorticoid action in rat hepatoma cells, 479
Leydig cell
LH action in, modulation by angiotensin II and corticotropin releasing hormone, 205
Mammary cancer
see "Breast cancer"
Meningioma cells
effect of steroids and antisteroids on, in human, 419
Mifepristone
new analogues of, with more dissociated antiprogesterone activities, 413
Mineralocorticoid(s)
C17-spirosteroidal, synthesis inhibitors, 455
Monoclonal antibodies
in breast cancer, 149
transformation of the estrogen receptor detected by, 297
mRNA
adrenodoxin, levels, 385
characterization of two, encoding human estradiol 17β-dehydrogenase and assignment of the gene to chromosome 17, 189
hormonal regulation of 3-hydroxy-3-methylglutaryl coenzyme reductase, in the rat adrenal gland, 379
hybridization, in prepuberal rat uteri, 289
prostate androgen receptor and characterization of, 311
*P*450-17α, regulation of, in Leydig cell, 205
Post-menopausal women
lack of diurnal variation in plasma levels of androstenedione, testosterone, estrone and estradiol in, 551
Progesterone
antitumor mechanism of, antagonists, 447
receptor(s)
concentration differences in the chick oviduct cells, 351
in chicken intestinal mesothelium and smooth muscle, 345
interaction with heat shock protein 90, in the chicken, 1
Receptor(s)
androgen
domain structure, genomic organization and regulation or expression of, 307
prostate, immunohistological localization and mRNA characterization, 311
structures, mutations, antibodies and cellular dynamics, 41
1,25-dihydroxyvitamin D_3, in the testis, 339
epidermal growth factor, in breast cancer, 123
estrogen
identification of constitutive and steroid-dependent transactivation domains in the mouse, 33
monoclonal antibodies and transformation of, 297
ontogeny in chick oviduct, 293
glucocorticoid
binding to DNA-cellulose and isolated nuclei, 319
effect of removal of an endogenous metal, 315
in mononuclear leukocytes, 331
non-activated: structure and activation, 53
phosphorylation and cycling in intact cells, 85
regulation of, activity, 71
progesterone
concentration differences in the chick oviduct cells, 351
in chicken intestinal mesothelium and smooth muscle, 345

interaction of, with heat shock protein 90, in the chicken, 1
steroid
and heat shock protein, 369
binding to HREs, vitellogenin and uteroglobin genes: correlation with, 11
chemical crosslinking: a useful tool for evaluation of, 363
hydrophobic cluster analysis (HCA) of the hormone-binding domain, 355
5α-Reductase
in rat prostate, 571
RU 38486
binding studies of, in Daudi and Raji lymphoma cells, 461
interrelationship between, and *P*450 activities in rat liver, 473
Secretory immune system
hormonal influence on, of the eye, 253
Serotonin
mechanism of action of, on frog adrenal cortex, 547
Sex binding protein
regulation of, synthesis in human cancer cell lines, 199
Sexual dimorphism
possible underlying mechanisms of, in the immune response, 241
Steroid sulfatase
testicular, in a cryptorchid rat strain, 555
Steroid sulphates
serum C-19, in females with clinical hyperandrogenism, 531
Tamoxifen
structural components necessary for the antiestrogenic activity of, 407
Testicular
an age-dependent thymic secretion modulates, function 541
cryptorchid rat strain, steroid sulfatase, 555
TR3
receptor, isolation and characterization of human, 391
Uterine leiomyoma
monoclonal antibody characterization of progesterone receptors, estrogen receptors, and the stress-responsive protein of 27 kDa in human, 491
Uteroglobin
gene, correlation with steroid receptors, 11
Vitamin D
multiple sites of action of, 339
